

Origami Nesting Box Instructions

Step 1

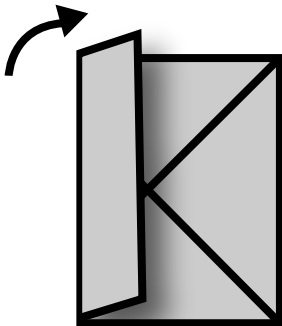

1. Cut a square piece of paper. The top nesting box square should be a 1/4 inch larger than the bottom. Draw a pencil line lightly from corner to corner.

Step 2

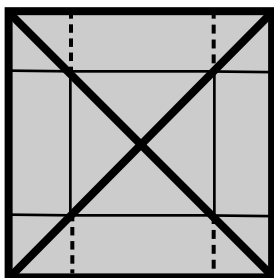

2. Fold from the corner into the center. Be as precise as possible and be crisp with your folds (use a finger nail or the side of your pencil). Repeat with all four sides.

Step 3

3. Fold a side into the center. **Open back up** and repeat on remaining three sides, folding and then **opening it back up**.

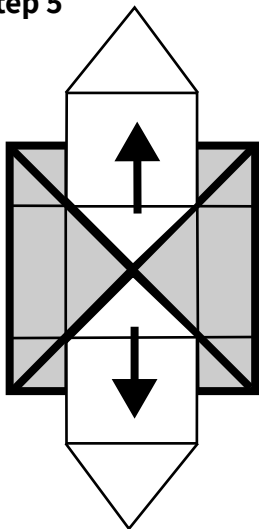

Step 4

4. Cut on lines that are dotted. A little flap should be able to spring up. **DO NOT CUT TOO FAR!** All cuts are in one direction. Do not cut the folds at right angle to the first cut or the entire corner will fall off and you can't correct that error.

Origami Nesting Box Instructions cont.

Step 5

5. Now pull out from the center two shapes that look like houses from opposite sides.

Step 6

6. Fold the gray areas from step 5 up and in. You will start to see the box form. Next, take the house structures and fold in. Repeat on the other side. Your nesting box is complete. To make the bottom, repeat with a square that is 1/4 inch smaller than the top.
